USAGE

TO PRODUCE SULPHURIC ACID,  
METAL LEACHING & CHEMICALS

# GRANULATED SULPHUR

(A)

## DESCRIPTION :

Granulated sulphur is a by-product recovered from the production and refining of oil and gas. The colour of granulated sulphur is bright yellow.

## USAGE :

Granulated sulphur is mainly used as a raw material to produce sulphuric acid, metal leaching and chemicals.

## OTHER :

It can be shipped in big bags, containers, wagons or bulk.  
Transportation – by auto transport, railways or ocean vessels.
